# Panel

From the mausoleum of Imam al-Shafi'i (607-08 AH / 1211 CE)

Fatimid, 5th century AH / 11th century CE

W: 13 cm; H: 45.8 cm

**Inv. no. 2112**

Recovered from the mausoleum of Imam al-Shafi'i (607-08 AH / 1211 CE), this panel features a geometric strapwork pattern of stars enclosing winged mythological creatures, possibly pegasi or griffins. The undecorated reverse suggests the panel was reused as a plain wooden element, likely removed from an earlier Fatimid structure. Panel Inv. No. 2111, also in the Museum's collection, is closely related to this piece.
