Ceiling

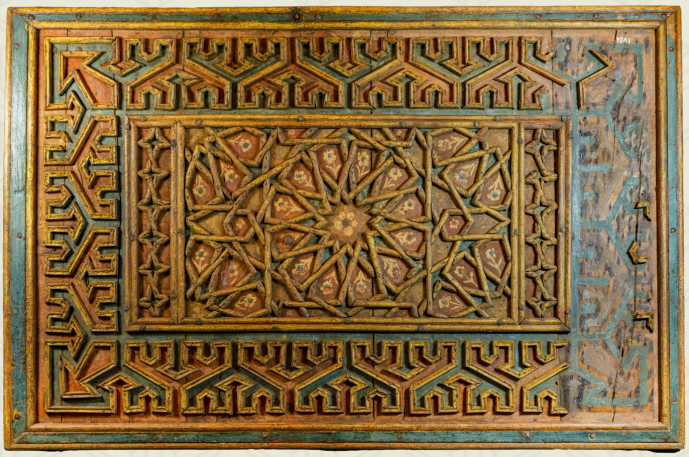

Recovered from a warehouse of the Ministry of Endowments (Awqaf) in Rashid

Ottoman, 10th-12th centuries AH / 16th-18th centuries CE

Wood

W: 126.4 cm; L: 81 cm

Inv. no. 3484

This wooden ceiling (tablia) from Rashid features a typically Ottoman-period combination of geometric star-patterns, painted with delicate floral motifs, and surrounded by a broad border of alternate Y's. Constructed in part from Acacia wood, the composition reflects the Ottoman penchant for joinery, rather than solely carving or painting, in ceiling decoration.
