Door Leaf

Ayyubid or Mamluk, late 6th-mid 7th centuries AH / late 12th-mid- 13th centuries CE

Wood

W: 180 cm; H: 39 cm

Hall 4

Inv. no. 4140

Wooden door leaf decorated with diagonally oriented elongated hexagons alternating with small triangles in a pattern known locally as kirindazi. The carved pieces are decorated with symmetrical arrangements of dense vegetal scrolls, complete with trilobed fleurons - sometimes with hollow centres - leaves, and buds. Compositions of this type were widespread in Cairo from the Ayyubid period onwards.
